CHEMIE

By CRC Industries 

Your Battery Terminal Protector

With the world focusing on electrification, the use of batteries is sharply increasing. Whether it be start batteries or energy storage batteries, all batteries require maintenance and protection for optimal performance.

With *Kontakt 701 Vaseline Spray* you can protect your **battery terminals, screw connectors and clamps** against corrosion. Failing to properly protect your battery connections can lead to a loss of electric power. For optimal corrosion protection apply a coating of approx. 1 mm.

- ✓ Produced from high purity Vaseline
- ✓ Easy to use compared to ordinary Vaseline. Spray and go
- ✓ Extension tube for accurate and precise application
- ✓ Excellent material compatibility
