

Aircraft waste & water systems

Callington's Aviation Maintenance Chemicals are sold to over 150 airlines, MRO and ground handling companies around the globe.

Our System 38 range of approved expert chemical solutions for aircraft waste and water systems, meets the highest standards of the industry and responds to today's safety and environmental aspirations and requirements.

UNIQUE: Bioclean 360™ and Unblock™ are the first aircraft approved concentrated deodorant for lavatories and pipe & tank descaling cleaner, to feature calculated and offset carbon footprints for CO2 Neutral Products !

Aircraft approved, non-flammable, multi-standard tested solutions.

Liquid & powder deodorant for lavatory. Lavatory pipe & tank cleaner and scale remover. Toilet odor neutralizer. Disinfection of Drinking Water Systems.

Manufactured across multiple locations worldwide.

Concentrated formulations for economics and controlled environmental impact.

Recyclable packaging and biodegradable formulations.

Calculated Carbon Footprint. Carbon Offset for NetZERO CO₂ Products.

CHEMICALS FOR AIRCRAFT WASTE AND WATER SYSTEMS

LAVATORY SYSTEMS

UNBLOCK

Toilet pipe and tank descaling cleaner. Removes build-ups and scale from the system. Effective descaling to maintain fully functioning toilet system. Water based biodegradable formulation. Active: Acetic acid. Suitable for recirculating and vacuum toilets. AMS 1640

Product Code	Product format	Units / Carton	CO2 / unit EXW Paris
AR0000042	2L bottle	10	1,07 Kg

UNBLOCK-S

Toilet pipe and tank descaling cleaners. Removes build-ups and scale from the system. Effective descaling to maintain fully functioning toilet system. Water based biodegradable formulation. Neutral odor. Active: Sulphamic acid. Suitable for recirculating and vacuum toilets. Crushed ice not required. Powerful enough for deep soaks during engineering checks. Can also be used diluted 1:1 in a regular cleaning cycle. AMS 1640

5120/33	2L bottle	10	Coming soon
---------	-----------	----	-------------

UNBLOCK-LSR

Specially formulated to prevent the formation of build-ups and scale. Unique clinging action technology. Coats waste tube walls and remains as a coat to soften existing scale and prepare it for removal. Proprietary blend of surfactants along with mild organic acids, and foaming agents. Crushed ice not required to improve Unblock-LSR. AIMS 09-00-002 - BSS7432

5124/30	1L bottle	12	Coming soon
---------	-----------	----	-------------

LAV'ODOR ELIMINATOR

Quickly poured into toilets or sinks, Lav'Odor immediately stops unpleasant smells. Compatible with 'blue' toilet treatment products. AMS 1476 - Boeing D6-17487

AR0000127	100mL bottle	12	Coming soon
-----------	--------------	----	-------------

BIOCLEAN 360 / BIOCLEAN 360 SC

Blue concentrated deodorising detergent for the sanitation of aircraft toilet systems. Prevents malodors. Keeps system clean and fully operational. For re-circulating and vacuum toilets. Biodegradable formulation. Concentrate 1:99 Super Concentrate (SC) 1:640 AMS 1476

BIOCLEAN 360
